INKJET COLOUR LABEL PRINTER

COLORWORKS™ C830

Epson's unique inkjet printer with tractor feeder delivers unsurpassed durability, endurance and printout quality to withstand the demanding conditions of the chemical and logistics industries. With the reliability to last 6x longer than conventional inkjet printers and exceptional ink capacity that allows longer continuous printing, frequent downtime will be a thing of the past.

Savings

Cost Effective

IT'S IN THE DETAILS.

Sharper printouts

Whether it's the chemical or logistics industries, Epson's inkjet printer with a tractor feeder is built to meet the toughest label printing specifications. With a long life suited for high print volume operations, high-capacity ink cartridges and sharp printouts on ultra-durable ink, business will run as reliably as your next printout.

Uninterrupted Heavy-duty Performance with Reduced Downtime

Assured Reliability

Epson's C830 inkjet printer is tough enough to handle the needs of industries and medical institutions that cannot afford downtime. With an impressive lifecycle of 600,000 pages* – 6x longer than conventional inkjet printers – downtime is dramatically reduced while the bottom line is improved with a lower total cost of ownership.

 * When printing on 241.3 mm x 279.4 mm (9.5" x 11") paper. Varies depending on usage environment, print pattern and type of paper used.

Easy Paper Handling

Even the best printers jam. With Epson technology, clearing paper jams is quick and fuss free. The C830 automatically releases paper guide when a jam is detected, allowing for the rapid removal and re-setting of media. Manual release can also be performed with a simple one-touch operation. Additionally, the top cover slides open easily for quick removal and print restart.

Revolutionary Print-head Protection

Printers that use fanfold paper tend to collect paper dust on the print head, which results in frequent nozzle clogging and missing ink dots. Epson's head protection system drastically reduces the accumulation of dust and dirt, providing longer continuous operation between periodic maintenance.

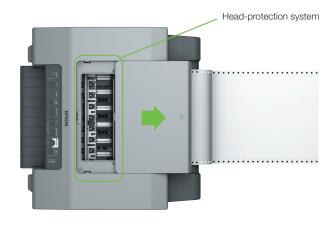

Paper-edge guide protects print head from paper dust.

Head-protection system

No head-protection system

The top cover slides open – a convenient safety feature that stops operation.

Effortless Workflow and Operation

High-capacity Ink Cartridges

High-capacity ink cartridges enable affordable, large-volume printing while dramatically decreasing downtime spent changing cartridges, creating more uptime and less periodic maintenance.

Built for Tough Work Environments

Built tough for demanding work environments, the C830 can withstand weights of up to 20 kg on the top. Comfortable side grips accommodating four fingers are also featured, making relocation easier.

Outstanding Output and Durability

Sharper Printouts

Epson DURABrite™ Ultra produces high-quality prints that have excellent resistance to water, chemicals, fading and smudges. Durability like this makes C830 ideal for hospitals, laboratories, supermarkets and wherever liquids or other moisture is present.

Barcodes are Clear and Sharp

Installing the included printer driver automatically loads fonts for barcode printing, assuring razor-sharp barcodes even on plain paper.

Barcode print comparison (end of ink supply)

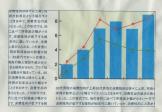

Crisp, high-density barcodes are printed consistently until the ink runs out.

Conventional dot impact printer

Faint, low-density barcodes when the ribbon is nearly used up exhibit decreased readability.

Epson pigment ink

Epson pigment ink is not water soluble and firmly binds to media fibers, resisting water and other moisture.

MRR BLE-VORLEYS

ZEGO-V, AR FAIN OR

ZEGO-V, DOFTCUL BL

ZEGO-V, D

Dye-based ink

Conventional dye-based ink is water soluble so printouts can be negatively affected by water and other moisture.

Reduced Noise and Power Usage

Unlike conventional dot impact printers, C830 inkjet printer operates quietly and do not contribute to workplace noise. In addition, they also consume less energy, which is a huge advantage for energy-conscious offices and in areas with inconsistent power supply.

High Output that Reduces Costs

The C830 shines in workplaces where fast printing is vital – with a fast 19.7^* ppm for C830. Overall running costs are lower compared to laser printers.

* Super draft mode.

PARTNERS IN PERFECTION

Save more with Epson individual cartridges

Enjoy greater savings with Epson's cost-effective ink cartridges. You can now maximise the usage of your ink cartridges by only replacing the empty cartridge, allowing for continuous printing.

Isaaa Rostrictions

When this product is used for applications requiring high reliability / safety such as transportation devises related to aviation, rail, marine, automotive etc.; disaster prevention devises; various safety devise etc; or functional / precision devise etc, you should use this product only after giving consideration by inclusion of fail-safes and redundancies into your design to maintain safety and total system reliability. Because this product was not intended for use in applications requiring extremely high reliability / safety such as aerospace equipment, main communication equipment, nuclear power control equipment, or medical equipment related to direct medical care etc, please make your own judgment on this product's suitability after full evaluation.

Epson ColorWorks ink is not intended for direct food contact.
